

Gender equality statement

EMEC is committed to achieving a working environment which provides equality of opportunity and eliminates unlawful discrimination. We aim and strive to be fully compliant with the Equality Act 2010, and are mindful of our obligations in respect of human rights and treating all staff, regardless of gender, with fairness, respect, dignity and equality at all times. EMEC is driven to identify and challenge gender biases in the workplace and has a commitment to gender equality, which is engrained in its core values.

EMEC remunerates its staff based on a set of pay scales which are applicable to the role that the staff member performs within the organisation. There are no roles within the organisation which are gender specific.

As of 1 July 2021, EMEC employed 60 staff of which 28 (46.7%) were female and 32 (53.3%) were male. Staff on part time contracts totalled nine (15%) and of these contracts 78% were female and 22% were male. Additionally, EMEC employed ten associates for occasional work of which all were male.

On 1 July 2021, EMEC's mean gender pay gap was 11.4% and the median gender pay gap was 10%. This was a reduction in values from the previous year and EMEC is actively working to continue to reduce these values.

EMEC's commitment to gender equality is reflected from Board level down with 50% female representation on the board, 25% female representation at executive level, and 50% female representation at senior management level (July 2021).

The following actions and activities underpin EMEC's commitment to gender equality:

- An annual staff survey is carried out which provides all staff with the opportunity to have a voice on EMEC and its culture.
- Data is collected on gender during recruitment of staff and analyses this data to ensure there is no gender bias in the process. Additionally, EMEC has recently undertaken an audit on recruitment and the gender pay gap, which provided further information on EMEC's current position in relation to gender equality and identified where improvements could be made.
- A 'Women at EMEC' group has been established, which looks at promoting gender equality. All staff are invited to participate in this group to promote gender equality and share information and experiences surrounding the topic.
